PPF4Ukraine AI-matching tool

Where *Swissness* Meets Ukrainian Needs

Why an AI-matching tool?

Ukraine's reconstruction requires more than financing. It requires the **right expertise, technologies and partnerships**. Switzerland has substantial **technical know-how** that can contribute to rebuilding municipal infrastructure.

But how do we ensure that the right **Swiss solutions** reach the **municipalities** that need them?

PPF4UKRAINE

Preparation Facility

One challenge

Navigating through abundant and fragmented information

18,123 – Public investment projects on local level https://dream.gov.ua/*

795,669 – Swiss companies registered https://chdata.ch/en*

*As of 22 October 2026

Opportunity: Turn scattered needs and expertise into meaningful connections

What is the AI-matching tool?

The AI-Matching Platform helps **connect municipalities** seeking support for reconstruction and development initiatives **with qualified Swiss companies** capable of delivering the required services, products, or expertise.

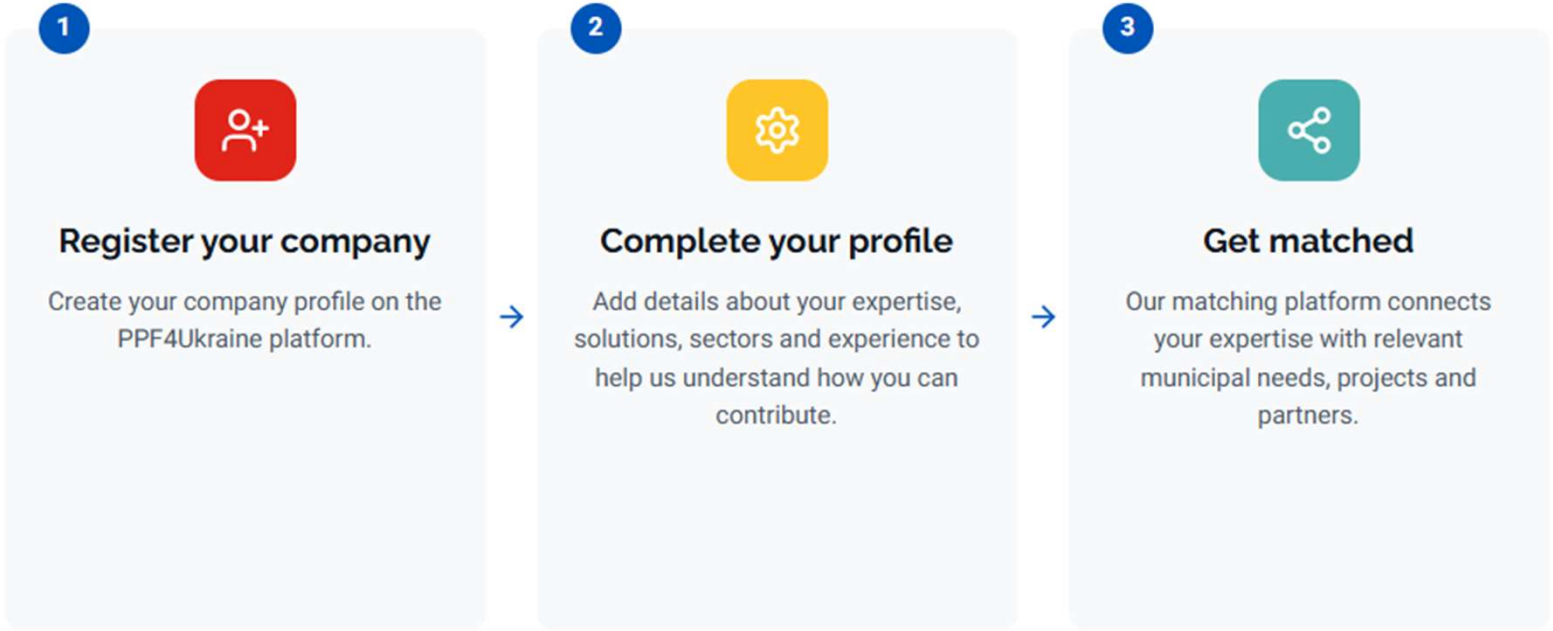

- The platform uses a combination of administrator review, web data enrichment, artificial intelligence analysis, vector-based search, and AI-powered matching to identify suitable companies for municipal needs.
- Company representatives are:
  - Registering their company
  - Providing company information
  - Updating company details, when/if requested
  - Reviewing approved matches
  - Providing feedback on matches
  - Rejecting irrelevant matches

How does it work?

Three steps from profile to potential match

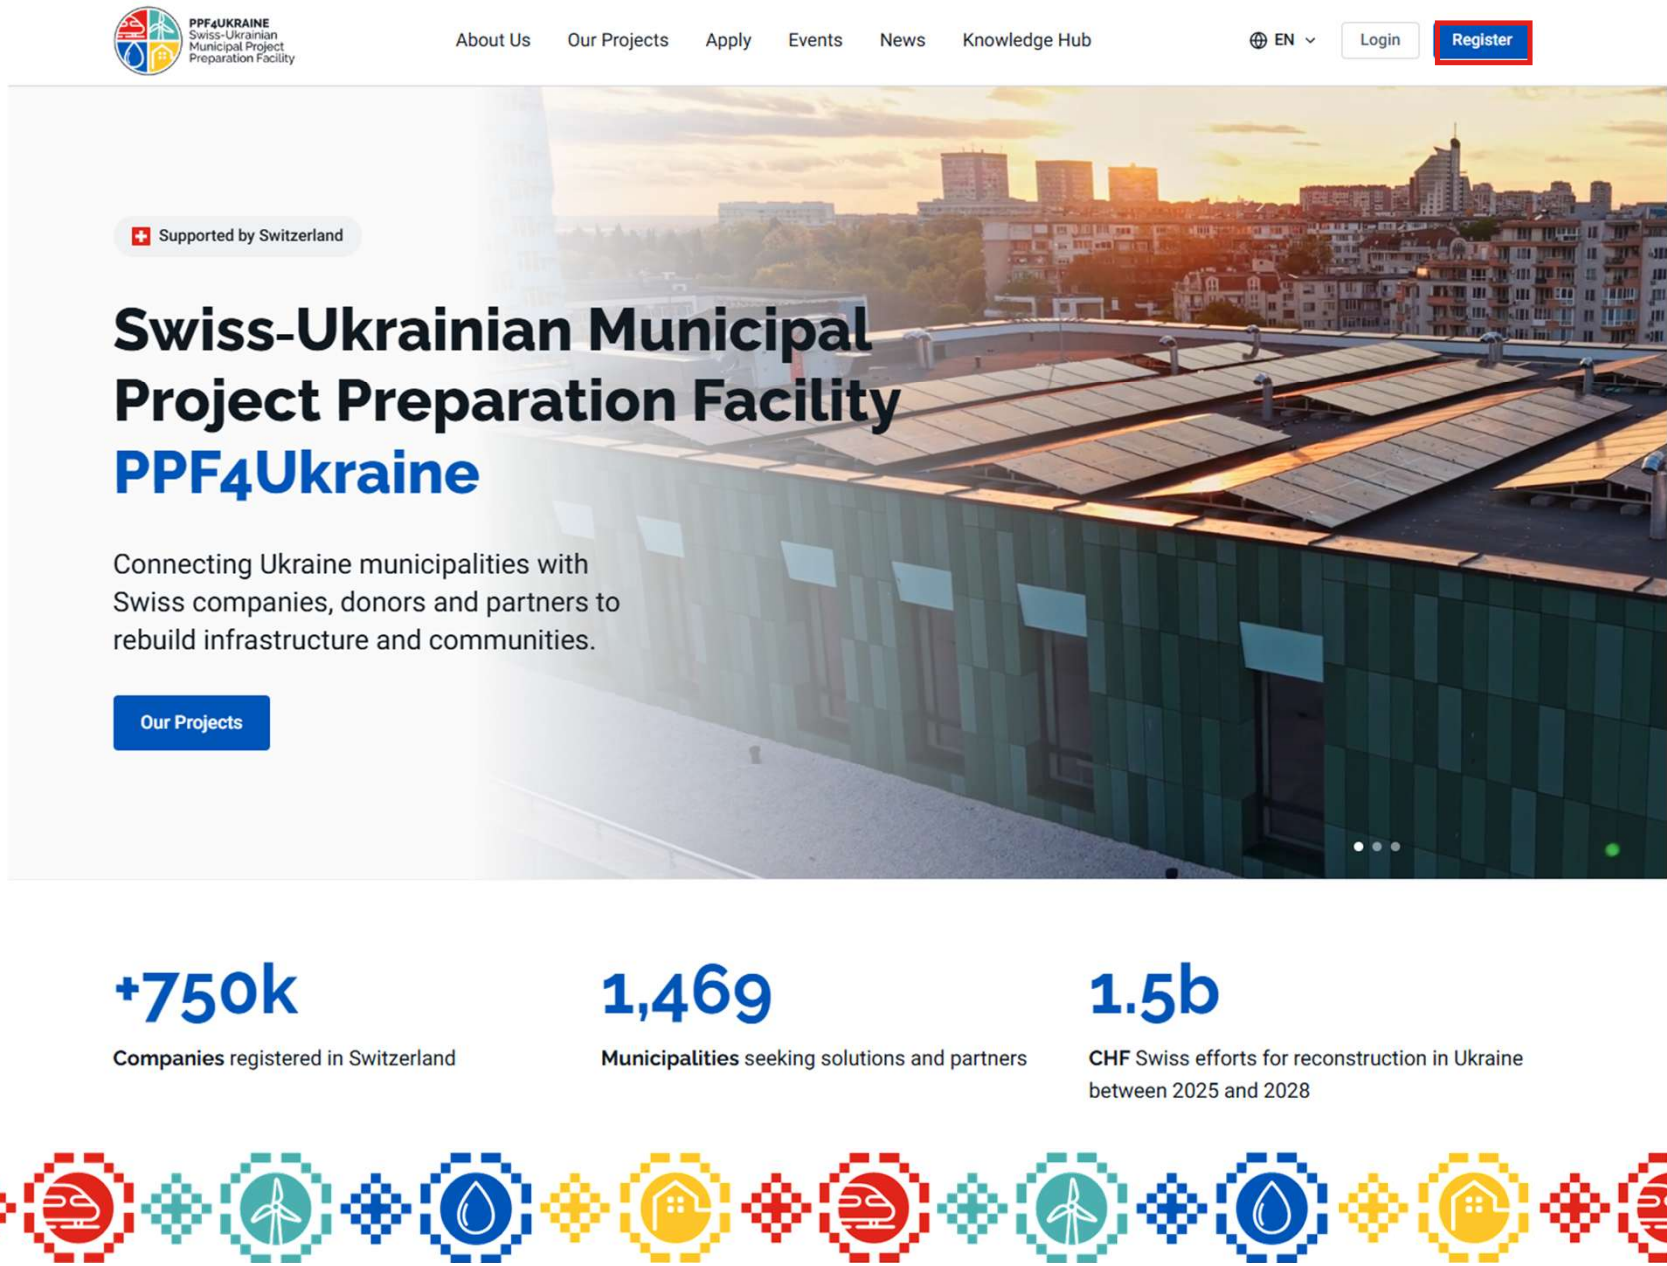

Project information may be sourced from DREAM and other PPF4Ukraine identification channels.

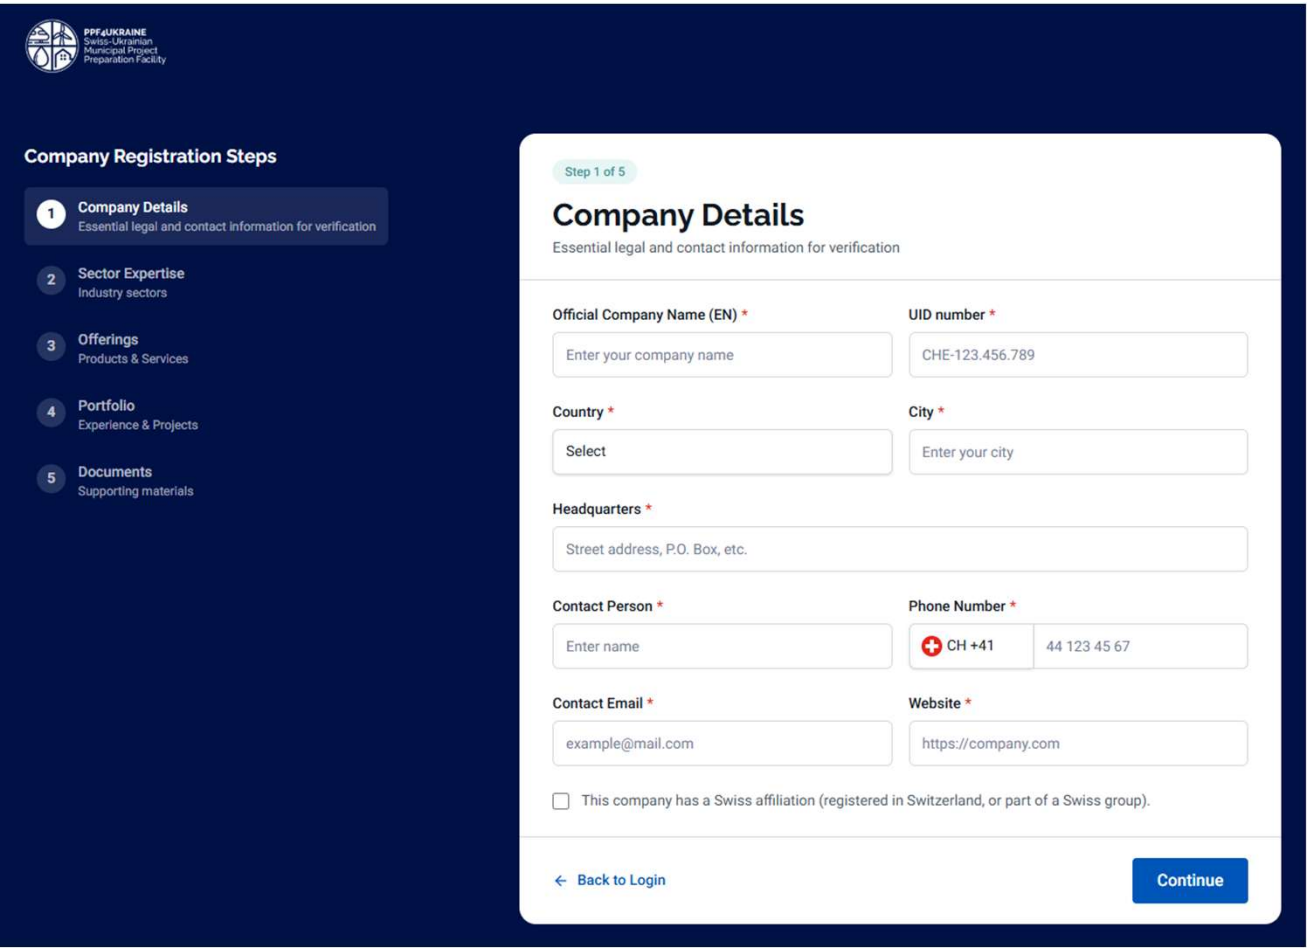

Accessing the Platform

ppf4ukraine.ch

- The starting point is our official website

Why should I register?

WIN-WIN-WIN

- **Greater visibility**: Make Swiss technologies and expertise visible in the reconstruction of Ukraine.
- **Relevant opportunities**: Discover projects and needs that are targeted with your company capabilities.
- **Early engagement**: Identify opportunities to contribute technical solutions during project development.
- **Use of your solutions:** We facilitate cooperation between Swiss stakeholders within studies and Quick-wins selected for PPF4Ukraine support.

* An important distinction is that the platform identifies potential connections, but it does not itself award contracts, approve projects or guarantee participation. PPF4Ukraine maintains its established project evaluation, approval and procurement procedures under the Operations Manual.
