PPF4Ukraine

Quick-Win Measures

Conditions and selection criteria under the Operations Manual

Steering Committee / Key Expert briefing · October 2026

What is a Quick-Win measure?

Definition

Small operational measures or pilot / demonstration projects that can be implemented rapidly, 100% grant financed

Main purpose

To demonstrate innovative approaches and Swiss technical solutions

Budget ceiling

Up to CHF 150,000 (excl. VAT & customs duties), total 1m CHF

Where

In municipalities at the PFS/FS stage

Partners

Joint Ukrainian municipality + Swiss partner

Delivery

Equipment supply & installation (TA), fast-tracked

The six conditions

Eligibility criteria a Quick-Win must meet

Eligibility criteria for Quick-Win measures

As defined in the Operations Manual — all six conditions must be met

1 Strategy & sector fit

In line with the municipality's strategy and infrastructure-development plans, and in an eligible sector.

2 Innovation & Swissness

Demonstrates innovative approaches and Swiss technical solutions supporting the selected projects.

3 High-priority need

Addresses the municipality's high-priority needs in infrastructure repair, renovation or restoration.

4 Fast implementation

Designed in a way that ensures rapid implementation.

5 Joint participation

Envisions participation of both the Ukrainian municipality and a Swiss partner.

6 Budget ceiling

Budget falls within CHF 150,000 (excluding VAT and customs duties).

How Quick-Wins are identified and selected

1

Linked to PFS/FS projects

Quick-Wins are selected only in municipalities participating in the PFS/FS stage of the programme.

2

Consultation by the IA

The Implementing Agency consults the municipality to identify measures based on local needs and the IA's innovative suggestions.

3

Eligibility check

Candidate measures are screened against the six eligibility criteria defined in the Operations Manual.

4

Alignment

Selected Quick-Wins must align with the projects chosen for preparation and implementation support in that municipality.

The Operations Manual further defines the implementation procedures — procurement, contracting, supervision and financing.

Where Quick-Wins sit in the Facility

Quick-Win measures are one of the two delivery streams under Component 1 (Project Preparation & Quick-Win Measures) — rapid, visible action alongside the preparation of bankable projects.

Component 1

Project Preparation & Quick-Win Measures

Feasibility studies, designs, ESIA — and rapid small-scale Quick-Win measures.

Component 2

Co-Financing Support

Carries prepared projects into implementation, aligned with IFI procedures.

Component 3

Swiss–Ukrainian Business Network

Fosters private-sector engagement and market partnerships.

Measures are delivered as technical assistance — equipment supply and installation for the approved Quick-Win.

First Quick-Wins — Vinnytsia

Two renewable-energy demonstration measures on municipal utility buildings

PV

PV plant — Vodokanal building

A rooftop photovoltaic installation on the municipal water utility (Vodokanal) building, cutting energy costs and demonstrating on-site renewable generation.

WT

Wind turbine — administrative building

A small wind turbine on a municipal administrative building — a visible demonstration of distributed renewable generation in the urban environment.

Why they qualify

- ✓ Innovative Swiss renewable-energy solutions
- ✓ High-priority municipal energy needs
- ✓ Fast to install · ≤ CHF 150,000 each

PPF4Ukraine

Quick-Wins: fast, visible, Swiss-made impact

Small measures that demonstrate innovation, build momentum, and open the way to the larger municipal investments the Facility prepares.
